

CAPACITY • HIGH-PRECISION • SPECIALTY • HONESTY

公司簡介

本公司成立於西元1965年10月，致力於研發與專業製造汽車之零組件已達50餘年，自成立以來本公司即不斷擴充自動化生產設備及檢測儀器，以生產高品質、高精密及高效能之汽車零件為職志。目前本公司之主要客戶涵蓋世界各國，主要產品有水邦浦、動力方向機、油壓邦浦、空壓零件、離合器系統、煞車系統...等

自1997年起，本公司為求永續經營且要求突破目前之技術層次，開始研發高效率、低噪音、重環保之「渦輪增壓器」。於西元2000年4月成功的推出第一款 **CHSH** 品牌渦輪增壓器。

本項「渦輪增壓器」不僅經過嚴格檢測及品管的層層把關，更經國家最高工業技術研究院檢測合格並給於高度肯定。且就目前國內製造業技術而言，尚無任何廠家開發此類產品，因此在經濟部2001年「鼓勵中小企業開發新技術推動計畫」本公司以「往復式引擎渦輪增壓器研究開發」獲得經濟部之研究獎勵。更於2002年底榮獲經濟部推選為績優廠商，特頒予「星耀獎」加以表揚與肯定。

我們歷經五十多年之企業成長與不斷升級，完全憑藉著本公司一貫的企業文化與經營理念：

CAPACITY 能力

自動化的生產設備及電腦化的製程控制

HIGH-PRECISION 高精密

各項精密量測儀器及100%品質管制

SPECIALTY 專業

豐富的經驗及不斷革新之研發技術

HONESTY 誠實

誠信待人實在做事

未來本公司將繼續秉持著高精密度與不斷創新的原則，開發規格齊全之「渦輪增壓器」尋求理想合作夥伴，共創21世紀雙贏的策略。

COMPANY PROFILE

The CHIH SHENG FACTORY CO.,LTD.(CHIAU CHENG) was established in Oct.1965 and has been devoted to the development of automotive parts and systems for over 50 years. In fact, we have been building and contributing the remarkable efforts to enhance our capabilities for generating the superior quality, great leading precision and efficient automotive parts by acquiring advanced automated machinery and testing equipment continually. Our main products include Water Pump System, Hydraulic Pump System, Air Compressor System, Clutch Booster System, and Air Brake System...etc.

Since 1997, with an aim to be international and competitive particularly in the global market. We have undoubtedly launched a program to form and progress the more functions of turbocharger with additional utilities such as high efficiency, environmental friendly and diminution in volume,and then successfully introduced the first generation of **CHSH** brand Turbocharger in April 2000.

Our turbocharger not only meets all the strict testing and quality requirements, also has been qualified and positively praised by the "Industrial Technology Research Institute (ITRI)", which has been acknowledged as one of the top industrial technology research organizations in Taiwan. Indeed,we are currently the only company which having this unique industrial capacity of producing such type of products in Taiwan! Additionally, our developing program of turbocharger was awarded and subsidized by the "SBIR" program launched by the Ministry of Economic Affairs which also mainly encourages small business to engage in product development. Furthermore, we have also been selected the best qualified business enterprise by Ministry of Economic in the end of 2002 and awarded "Star Luminescent Award" as the recognition and affirmation for our recent achievement.

With the purpose of being more successful, there are four basic principles which significantly adopted and completely practiced as the parts of CHSH's long-term business developing strategies:

CAPACITY

Realization of production automation and computerized manufacturing process control.

HIGH-PRECISION

Utilization of high-end testing equipment as well as advanced quality control methods.

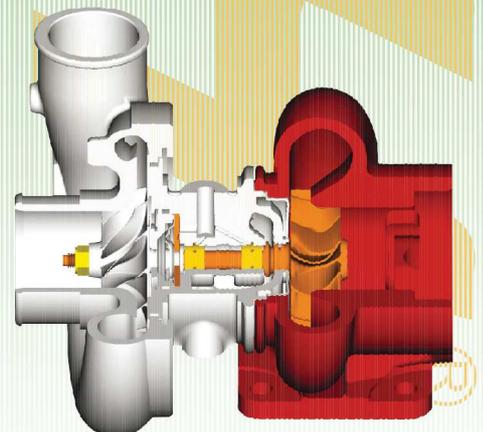

SPECIALTY

Be experienced, professional and innovative in technology development continually.

HONESTY

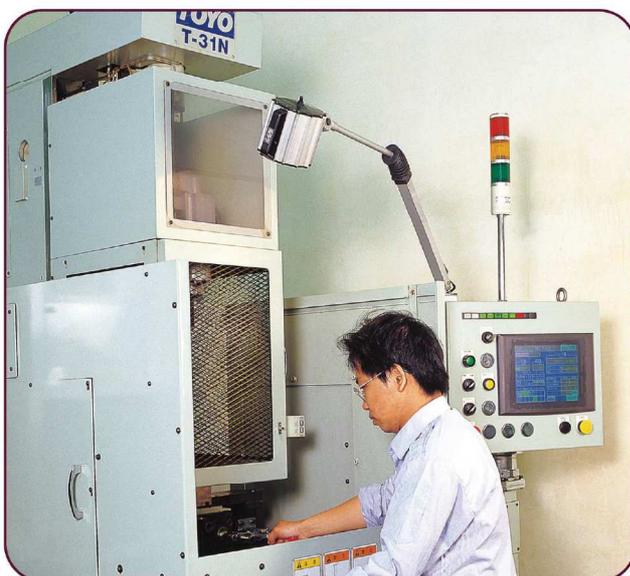

Honesty is constantly being one of the key concerns as the internal and external industrial spirit and attitude to the clients.

In the future, via applying the four main approaches above for CHSH's further innovating and developing high-precision products and all ranges of turbochargers persistently and certainly, discovering the appropriate partnership and creating the "Win-Win" aspect for both or more cooperating parties in order to benefit and satisfy all the clients needs.

自動化生產設備 - AUTOMATIC PRODUCING EQUIPMENT

自動化生產設備 - Automatic Producing Equipment

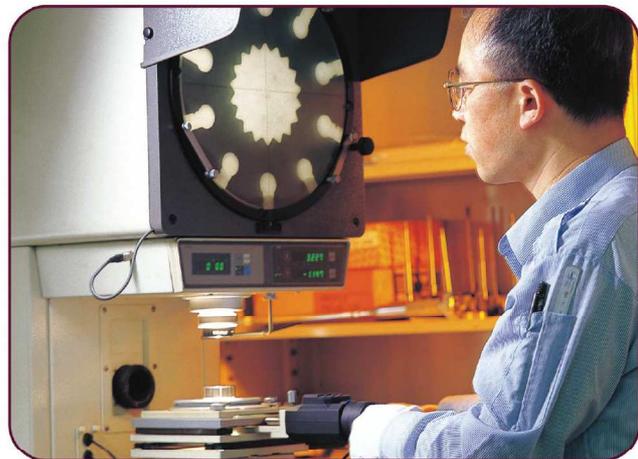

動平衡檢驗設備 - Balance Test Equipment

動平衡檢驗設備 - BALANCE TEST EQUIPMENT

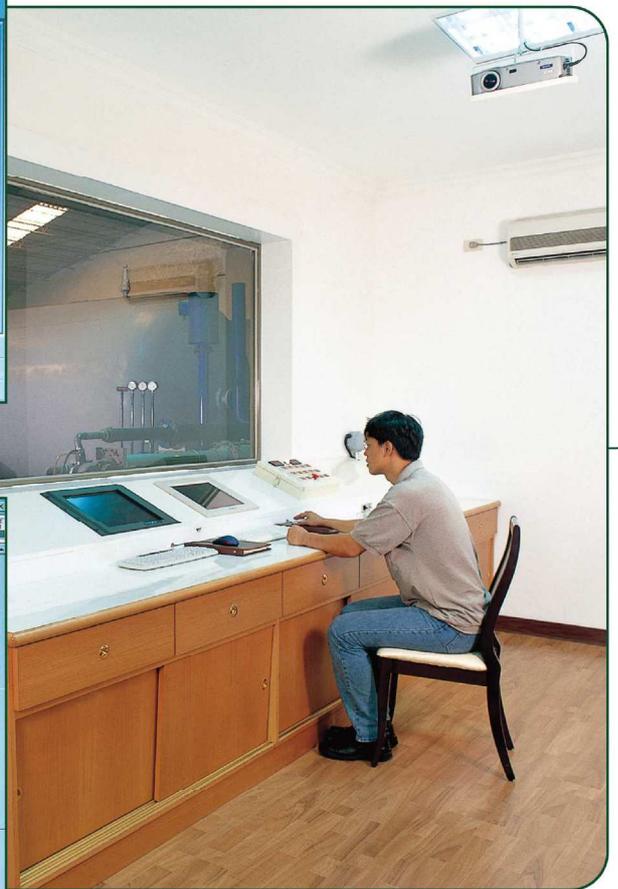

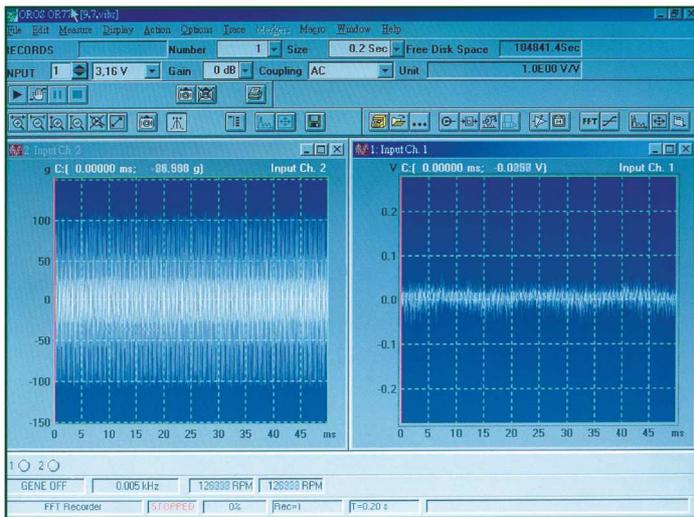

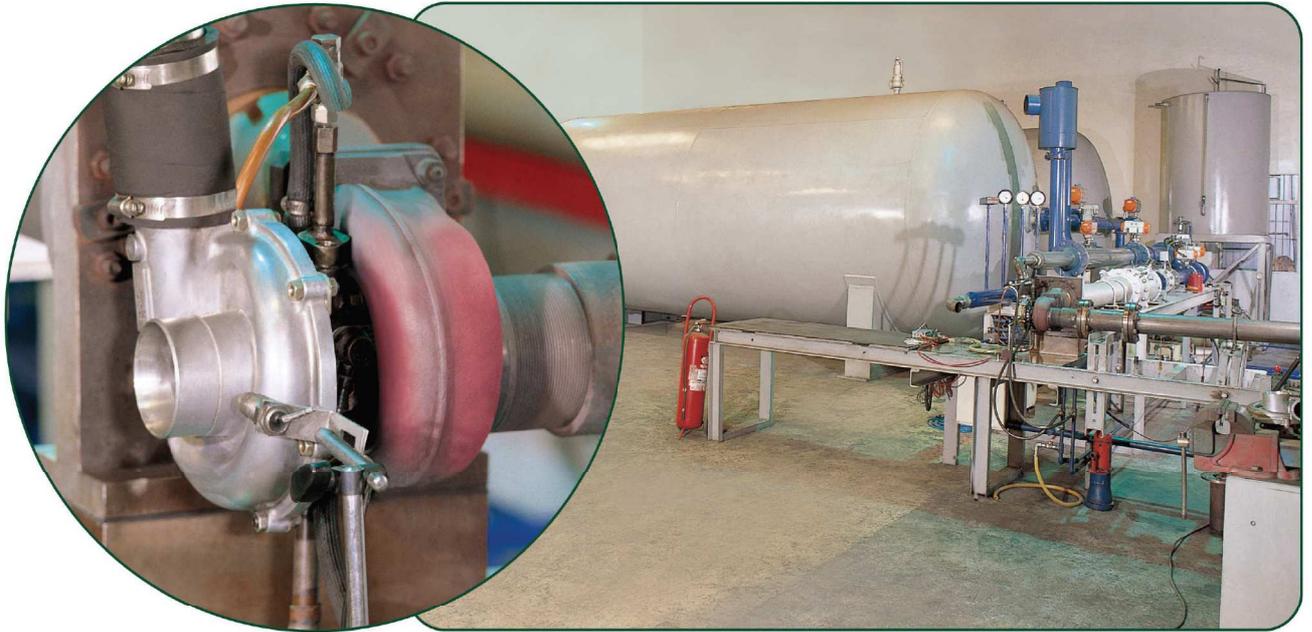

精密測量儀器 - PRECISE MEASURING INSTRUMENT

精密測量儀器 - Precise Measuring Instrument

渦輪增壓器設計 / 製造 / 測試 - TURBOCHARGER DEVELOPMENT

渦輪增壓器設計 / 製造 / 測試 - Turbocharger Development

實驗室特性：

1. 國內第一座渦輪增壓器性能測試暨數據平台。
2. 測試能量涵蓋世界上所有廠牌產品，壓縮比 0~5；流量範圍 0~2kg/sec。
3. 網際網路遙控遙測系統。

Laboratory Characteristics:

1. The first Local Turbocharger Performance Tester and Digital Platform.
2. The Test Capacity covers all the brands in the world with the Compression Rate 0~5 ; flow capacity range 0~2 kg/sec.
3. Internet Remote Control System.

Pressure Ratio

技術特點與技術應用範圍描述

特點：

1. 渦輪機械設計，分析技術（實驗室）。
2. 葉輪鑄造技術。
3. 渦輪機械測試平台設計技術（整廠）。
4. 內燃機引擎渦輪增壓。

The Description of The Technical Features and Technical Application Range

Characteristic :

1. Design and analysis of turbomachinery.
 2. Gas turbine blisc casting techniques.
 3. Test rig design for turbomachinery.
- Turbomachinery the internal combustion engine.

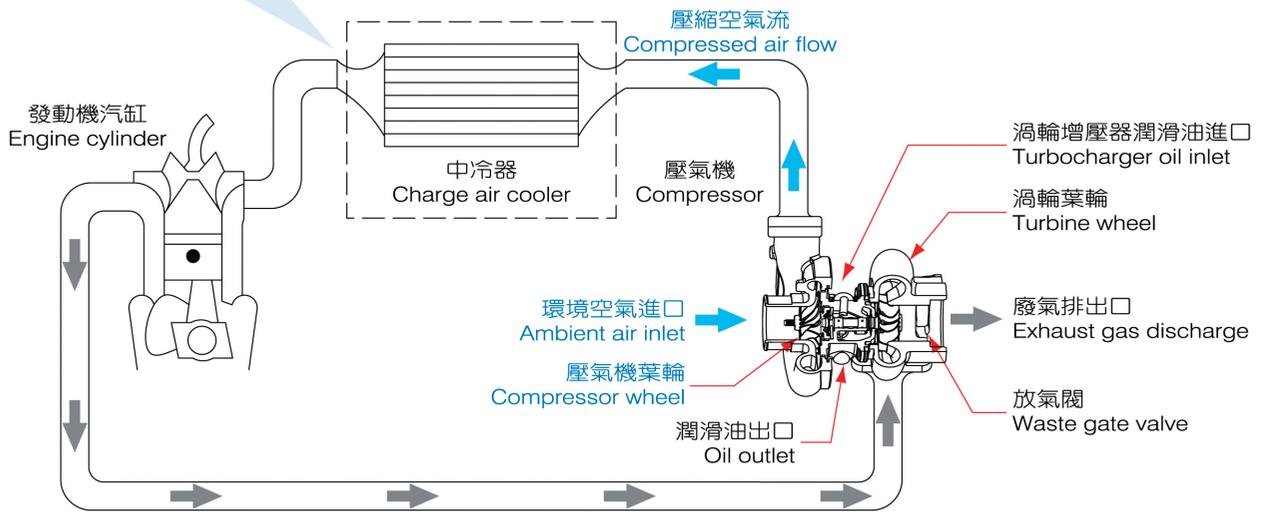

渦輪增壓器的基本知識 - TURBOCHARGER BASICS

渦輪增壓器是用來提高引擎功率和減少排放黑煙的重要部件。渦輪增壓器本身不是一種動力源，它利用引擎排氣中的剩餘能量來工作，其作用是向引擎提供更多的壓縮空氣。

Turbocharger is an important part used to increase the engine efficiency and to reduce black smoke exhaust discharge. The Turbocharger itself is not a power unit source; it works on left over energy from the engine exhaust to provide more compressed air to the engine.

在增壓中冷型發動機系統中，中冷器位於渦輪增壓器壓氣機的下流，其作用是降低壓縮空氣的溫度，從而進一步增加壓縮空氣的密度。

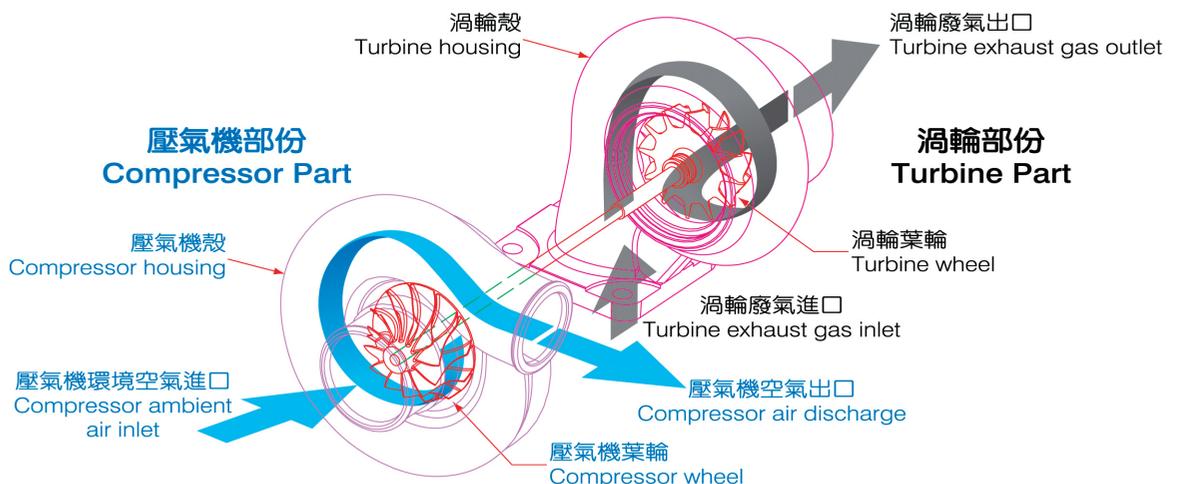

In a boosting cold start engine system, the charge air cooler, placed downstream from the turbocharger compressor, works to lower the temperature of and thereby increase the density of the compressed air.

渦輪增壓器工作原理圖 - Illustration of Turbocharger Operating Principle

渦輪增壓器安裝在引擎排氣管上，引擎汽缸排出的廢氣推動渦輪葉輪轉動，再帶動壓氣機葉輪將經空濾器濾清的空氣加壓後送入氣缸。因為進入氣缸的空氣增多，所以允許噴入更多的燃油，使燃油更充分的燃燒，然而使引擎產生更大的功率或降低排放黑煙。渦輪增壓器還可使引擎在高原上工作時獲得功率補償。

Turbocharger is installed on the exhaust manifold of the engine. The exhaust from the engine cylinder causes the turbine wheel to spin, which then causes the compressor wheel to compress air, filtered through the air filter, to send to the cylinder. The increase of air into the cylinder allows for more fuel injection; fuel burns more efficiently and the engine produces more power along with a reduced amount of black smoke exhaust. The Turbocharger also compensates power when the engine is operating at higher altitudes.
